
Configure Versa Secure Access Threat Notifications

 For supported software information, click [here](#).

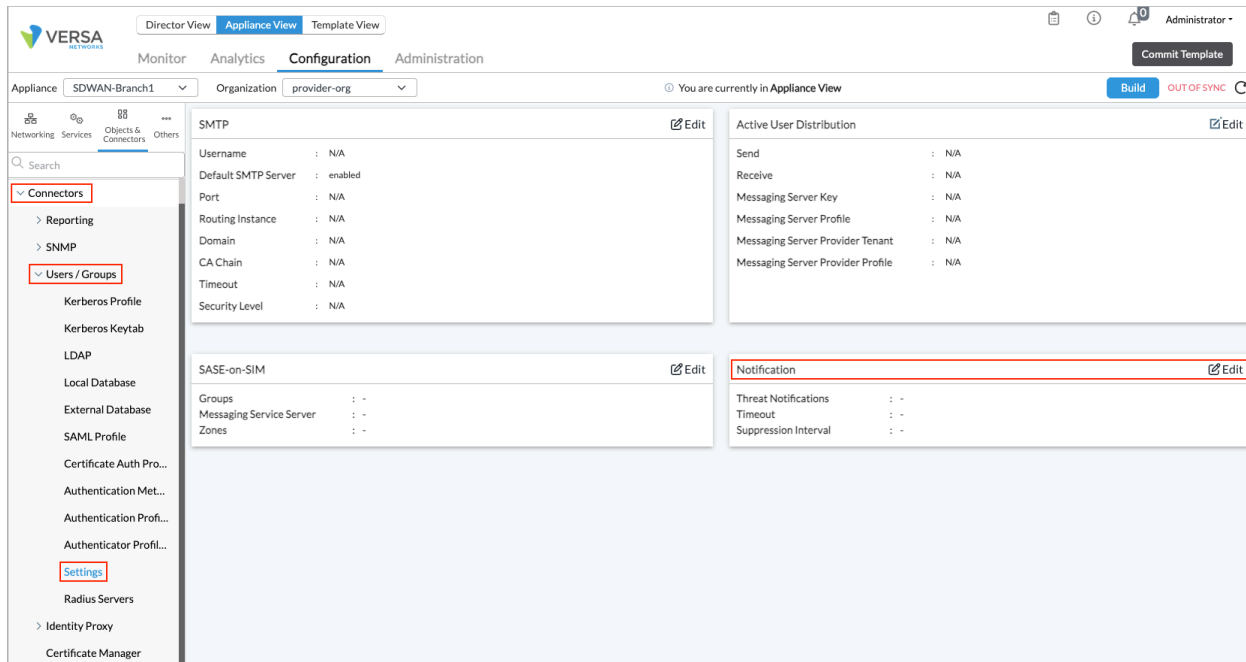

You can configure a VOS device to send Versa Secure Access (VSA) threat notifications for features that support VSA notifications. These applications include:

- Advanced threat protection (ATP)
- Antivirus (AV)
- Cloud access security broker (CASB)
- Data loss prevention (DLP)
- Intrusion prevention system (IPS)
- IP filtering

The notifications occur when an application attempts an activity that is subject to a security rule. When this occurs, a notification is sent that identifies the application that was used and the activity that was attempted.

To configure VSA notifications:

1. In Director view:
 - a. Select the Administration tab in the top menu bar.
 - b. Select Appliances in the left menu bar.
 - c. Select a device name in the main panel. The view changes to Appliance view.
2. Select the Configuration tab in the top menu bar.
3. Select Objects & Connectors > Connectors > Users/Groups > Settings in the left menu bar.

- Click the  Edit icon in the Notification pane. In the Edit Notification popup window, enter information for the following fields.

Edit Notification

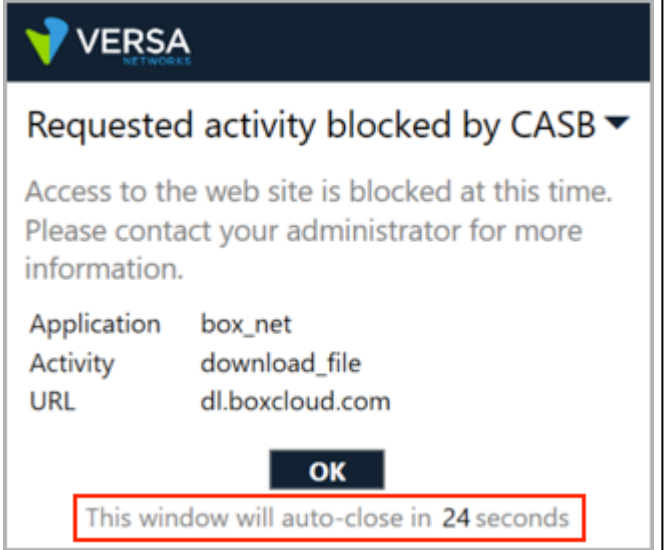

Timeout

Suppression Interval

☐ Threat Notifications

OK

Cancel

Field	Description
Timeout	<p>Enter the timeout period, in seconds, after which notifications stop being sent.</p>  <p><i>Range:</i> 1 through 254 seconds</p> <p><i>Default:</i> 30 seconds</p>
Suppression Interval	<p>Enter the duplicate notification suppression interval, in seconds. If an event (an application plus the attempted activity) occurs that causes VOS to send a notification, and if the same event occurs within the suppression interval period, no additional notifications will be sent until the suppression interval ends. The notification message shows the how much time remains until the suppression interval ends:</p> <p><i>Range:</i> 1 through 254 seconds</p> <p><i>Default:</i> 120 seconds</p>
Threat Notifications	Click the check box to enable VSA threat notifications.

5. Click OK.

Supported Software Information

Releases 22.1.1 and later support all content described in this article.
