

Monitor Devices in Provider Organizations

 For supported software information, click [here](#).

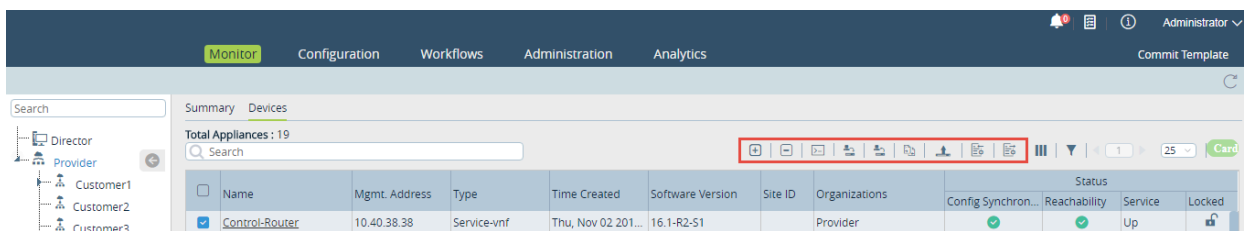

The devices that are associated with the provider are listed here. The dashboard displays real-time statistics with respect to the complete device. Port statistics refers to the full utilization report of the port of all the customer organizations associated with the device. The dashboard displays the control plane information of the provider organization.

Go to Monitor > Provider Organization > Devices > Device to view the real-time health and performance of the device.

Summary Devices										
Total Appliances : 19										
Q Search										
Name	Mgmt. Address	Type	Time Created	Software Version	Site ID	Organizations	Config Synchron...	Reachability	Service	Locked
