

## Configure System Settings for Concerto

 For supported software information, click [here](#).

You can configure global settings for retaining audit logs, publishing history, APIs, and host headers for the Concerto system.

To configure these global system settings:

1. Go to Settings > System Settings.

The System Settings screen displays. Enter information for the following fields.

Field	Description
Audit Log Maximum Days of Retention	<p>Enter the maximum number of days for which to retain audit log records.</p> <p><i>Range: 2 through 365 days</i></p>
SSE Maximum Publishing Histories	<p>Enter the maximum number of publishing records to save and display. For more information, see <a href="#">Publish SASE Gateways</a>.</p> <p><i>Range: 2 though 10</i></p>
API Whitelist Subnet	<p>Enter the subnets of outside REST APIs that you want to allow. By default, all REST APIs from clients outside the network are blocked.</p>
Host Header Whitelist	<p>Enter the subnets of host headers that you want to allow.</p>

2. Click Save.

## Supported Software Information

Releases 12.1.1 and later support all content described in this article.
